Summary

8th-semester Software Engineering student with hands-on experience in web development, databases and software testing. I've built frontend interfaces for a US ride-hailing company, an account-reconciliation tool during an internship at a financial institution, Odoo booking modules and AI projects (neural networks, license-plate recognition, fuzzy logic). I work in agile teams with Git, code reviews and automated tests.

Experience

Pre-professional intern · Developer
2025

Financial institution · Ecuador

- Built an account-reconciliation program that cross-checks balances and flags differences.
- Wrote SQL queries and reports for the operations team.
- Tested each release with real scenarios before handing it over.

Front-End Developer
MAR – JUL 2024

Apollo S.A. · Remote (San Francisco, USA)

- Built and maintained interfaces for a ride-hailing app.
- Created reusable components and dynamic views across modules.
- Integrated REST APIs for data visualisation and reports.
- Took part in functional testing and code reviews.

Junior Web Developer
2023

Car-rental company

- Built web features with JavaScript, HTML, CSS and Node.js.

Selected projects

FashionIA
2026

Python · Fuzzy logic · Genetic algorithms

A comfort recommender for garments: fuzzy Mamdani inference scores comfort per body zone and a genetic algorithm searches the optimal pattern measurements (chest, waist, hip).

Chat Básico
2026

Node.js · Socket.IO · WebRTC · SQLite · Stryker

Real-time chat with video calls and no login. Covered by unit, integration, concurrency and UI tests, plus coverage reports, SonarJS linting and mutation testing.

License plate recognition
2026

Python · OpenCV · Neural networks

Detects vehicle license plates in images and reads their characters, combining image processing with a trained recognition model.

Account reconciliation system
2025

SQL · .NET · Reporting

Built during my pre-professional internship: a program that cross-checks account balances and flags mismatches, turning a slow manual task into a fast, reliable report.

Hotel booking on Odoo 2025

Odoo · Python · PostgreSQL

Booking websites and custom modules on Odoo: rooms, availability, reservations and customer management, all inside the ERP.

MNIST neural network 2026

Python · Neural networks · KNN

Handwritten-digit classifier with a neural network and a KNN baseline, with learning curves, a confusion matrix and visual predictions.

Hospital management 2025

React · Node.js · MongoDB

Hospital management app with authentication, roles and simulated clinical records.

APE7 · GPIS 2025

TypeScript · Docker · Jenkins · Handlebars

Team project with a decoupled frontend and backend, containerised with Docker Compose and delivered through a Jenkins pipeline.

BookingView 2025

Node.js · MongoDB · REST

Accommodation booking platform with users, listings, reservations and availability, backed by a REST API.

QA project series 2026

Node.js · Mocha · Chai · Express

Five test-driven apps: metric-imperial converter, American/British translator, sudoku solver, personal library and issue tracker, each with unit and functional test suites.

Technical skills

Frontend	Angular, TypeScript, Next.js, React, JavaScript, HTML5 & CSS3, Bootstrap, Responsive UI
Backend	.NET / .NET Core, ASP.NET, C#, NestJS, Node.js & Express, REST APIs, Microservices, Java, Python
Databases	SQL Server, PostgreSQL, MySQL, MongoDB, Firebase, EF Migrations, SSAS / Data Warehousing, Query optimisation
QA & Testing	Unit & integration tests, Functional testing, Mutation testing (Stryker), JUnit, Mocha & Chai, ESLint + SonarJS, Code review, CI with Jenkins
Tools & more	Git & GitHub, Docker, Jira, Azure DevOps, Odoo, Wireframes & mockups, Scrum, AI / ML (Python)

Education

B.Sc. Software Engineering · Universidad Técnica de Ambato · 2022 – present (8th semester)

Technical high-school diploma in Electrical Installations, with honours · U.E. Ramón Barba Naranjo · 2019 – 2022

Certificates

- CSEI 2024 · Participation · 2024
- CSEI 2024 · Approval · 2024
- GitHub achievements · 2024 – 2026
- Technical high-school diploma with honours · 2022

Languages

Spanish (native) · English (intermediate)
